Dear Participant,
Medicon's commitment to the training of the central sterilization and operating room staff began in the 1990s.
We started in Germany, where the trend towards certified and professional training for staff in the central sterilization department was becoming increasingly strong. Over the years we gained a very broad knowledge on the appropriate treatment of surgical instruments in the cycle of reconditioning.
In addition, we can give an in-depth view on all topics concerning surgical instruments such as:

- Materials
- Manufacturing process
- Technical verification of surgical instruments
- Reconditioning cycle
- Assessment of alterations and damage of the surface
- Workshop
- Evaluation

That is why in Tuttlingen we are called.
"The Instrument Guys."

Come to Tuttlingen and share two / three days filled with
