COURSES

All About Instruments

Dear participant,
Medicon's commitment to the training about all things concerning handling and maintenance began in the 1990s.

We started in Germany, where the trend towards certified and professional training for staff in the central sterilization department was becoming increasingly strong. Over the years we gained a very broad knowledge on the appropriate treatment of surgical instruments in the cycle of reprocessing.

In addition, we can give an in-depth view on all topics concerning surgical instruments such as:

- Materials
- Manufacturing process
- Technical control and functional testing of surgical instruments
- Reprocessing cycle
- Assessment of alterations and damages of the surface
- Workshop

That is why in Tuttlingen we are called.
"The Instrument Guys."

Come to Tuttlingen and share two days filled with

The Instrument Guys
